PATENT APPLICATION

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of

Docket No: Q85161

Hirokazu KARIYAZAKI, et al.

Appln. No.: 10/516,453

Group Art Unit: 3682

Confirmation No.: 2857

Examiner: Not Yet Assigned

Filed: December 3, 2004

For: ARTICULATED ROBOT AND CONTROL APPARATUS OF THE SAME

INFORMATION DISCLOSURE STATEMENT
UNDER 37 C.F.R. §§ 1.97 and 1.98

MAIL STOP AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicants hereby notify the U.S. Patent and Trademark Office of the documents which are listed on the attached PTO/SB/08 A & B (modified) form and/or listed herein and which the Examiner may deem material to patentability of the claims of the above-identified application.

One copy of each of the listed documents is submitted herewith, except for the following: U.S. patents and/or U.S. patent publications; and co-pending non-provisional U.S. applications filed after June 30, 2003.

The present Information Disclosure Statement is being filed: (1) No later than three months from the application's filing date; (2) Before the mailing date of the first Office Action on the merits (whichever is later); or (3) Before the mailing date of the first Office Action after

filing a request for continued examination (RCE) under §1.114, and therefore, no Statement under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicant submits the following explanations: English language abstracts, submitted herewith, constitute concise statements of relevance for Japanese Patent Application Publication No. 2000-190258.

Korean Patent Application No. 2000-0014795 relates to a rectilinear interpolating method of a transporter of an orthogonal coordinate, and includes

(ST21) a step of waiting an occurrence of a timer frequency to transmit a signal for starting a program processing to the CPU of the main control device;

(ST22) a step of calculating P_{xi} and P_{yi} on a plan route;

(ST23) a step of reading a position error F_{xi} and F_{yi} ;

(ST24) a step of deriving a position increment amount ΔP_{xi} and ΔP_{yi} ;

(ST25) a step of deriving a position error increment amount ΔF_{xi} and ΔF_{yi} ;

(ST26) a step of deriving ratios R_{pi} and R_{fi} of variation of the position increment amount and the position error increment amount;

(ST27) a step of deriving new target positions NP_{xi} and NP_{yi} by respectively multiplying P_{xi} and P_{yi} by a ratio between R_{pi} and R_{fi} ;

(ST28) a step of subtracting NP_{xi} and NP_{yi} from increment amount to P_{xn} and P_{yn} ;

(ST29) a step of transmitting new orders NP_{xi} and NP_{yi} to the servo;

(ST30) a step of determining whether or not having reached the finishing point to finish the rectilinear interpolation;

Owing to this, it is possible to minimize an error during high speed transporting so that an actual route of a rectilinear motion by the trajectory interpolation in the X-Y table system coincides with a plan route as a table of an orthogonal coordinate robot or a milling machine.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account.

Respectfully submitted,

/Chidambaram.S.Iyer/
